

Summary

Project Name

Patterns

Project Repository

<https://github.com/Lukeekul/wahlzeit>

Project CI

<https://travis-ci.org/Lukeekul/wahlzeit>

Current Tag

adap-hw04 on master

Diff to last tag

<https://github.com/Lukeekul/wahlzeit/compare/adap-hw03...Lukeekul:adap-hw04>

Details

- Added PatternPhoto.java, PatternPhotoManager.java and PatternPhotoFactory.java
- No new Attributes for PatternPhoto Class, all member functions are public, Constructor calling super Class
- PatternPhotoFactory overriding all member functions to return PatternPhoto Type, not quite sure if Factory is still singleton, maybe PhotoFactory should be abstract now?
- Added PatternPhotoManager according to UML Spec
- Not quite sure where to change Photo to PatternPhoto in wahlzeit?
- Travis build succeeded, tests passed
